/n software Red Carpet Subscription

Everything you need to build connected applications.

Publisher: /n software | Category: Communication & Messaging

Components for every major protocol from FTP to IMAP to SNMP, SSL and SSH security, S/MIME encryption, Digital Certificates, Credit Card Processing, ZIP compression, Shipping and Tracking, and e-business (EDI) transactions.

IP*Works! New Features

The latest version comes with new WebSocket, CertMgr and OAuth components, HTTP/2 support, security improvements and support for the latest technologies, including Visual Studio 2017 and macOS Sierra.

Core Components

IP*Works! is a comprehensive framework for Internet development. It provides programmable, SSL-enabled components for sending email, transferring files, managing networks, browsing the Web and much more.

Secure SSH Connectivity

Easily integrate Secure Shell (SSH) security into your Internet applications. IP*Works! SSH includes SSH-enabled client, server and proxy components that support strong SSH encryption and advanced cryptography.

Prices from 1.462,00 €

Aspose.Total for .NET

Open, create, convert, print & save files from within your own applications.

Publisher: Aspose | Category: Document & Text Processing | ★★★★★

Aspose.Total for .NET is a compilation of every .NET component offered by Aspose. It allows you to create a wide range of applications that work with file formats from Excel, Word, PowerPoint, Project, OneNote, Outlook, Visio and PDF.

Aspose.Pdf for .NET

Includes a set of APIs for PDF document creation and manipulation, without using Adobe Acrobat. You can also transform each page of a PDF into conventional image formats such as BMP, JPEG, PNG and GIF.

Aspose.Cells for .NET

Create, read, edit, convert, protect or print Excel spreadsheets including more than 10 file formats without installing Microsoft Excel. Includes a combination of APIs and GUI controls.

Aspose.Slides for .NET

Enables any .NET application to read, write, modify and convert PowerPoint documents, without the need for Microsoft PowerPoint. It can render presentation slides to PDF, XPS, HTML, Images and PDF Notes.

File Format APIs

Open, Create, Convert, Print and Save files from your applications!

Aspose.Total

Enable your applications to manipulate Word, Excel, PDF, PowerPoint, Outlook and more than 100 other file formats for all major platforms.

Aspose.Words

Create, edit, convert or print Word documents (DOC, DOCX, RTF...)

Aspose.Cells

Create, Edit or Convert Excel worksheets (XLS, XLSX, ODS...)

Aspose.Pdf

Manipulate PDF file formats (PDF, PDF/A, XPS...)

Aspose.Slides

Create, edit or convert PowerPoint presentations (PPT, PPTX, ODP...)

Aspose.Email

Manipulate Email file formats (MSG, PST, EML...) and popular network protocols (Exchange, SMTP, IMAP...)

Aspose.BarCode

Generate or recognize barcodes (Code128, PDF417, Postnet...)

► Aspose.Imaging ► Aspose.Tasks ► Aspose.OCR ► Aspose.Diagram ► Aspose.Note ► Aspose.3D

Aspose.Words for .NET

Advanced .NET APIs to manipulate word processing documents.

Publisher: Aspose | Category: Word Processing | ★★★★★

Perform a wide range of document processing tasks directly within your .NET applications, without using Microsoft Word. Supports DOC, OOXML, RTF, HTML, OpenDocument, PDF, XPS, EPUB and many other formats.

Render, Print & View Documents

Print or convert whole documents or even individual pages from Word documents to TIFF, PNG, BMP, JPEG, SVG or EMF images. You can also render (draw) any document page onto a .NET Graphic object.

Advanced Document Processing

You can insert formatted text, images, tables and other content into a document. You can also combine documents, move sections between documents, and add images stored outside of the database.

Reporting and Mail Merge

Design reports in Microsoft Word and then use Aspose.Words to populate documents with data from a number of sources. You can also perform complex operations including inserting images and repeatable regions.

Prices from 914,00 €
www.componentsource.com/aspose-words-net

Manipulating Documents?

APIs to view, convert, annotate, compare, sign, assemble and search documents in your applications.

GroupDocs.Viewer

Boost your document viewing process to view over 50 documents and image formats in any application without any external viewers using document viewer APIs.

GroupDocs.Conversion

Enhance your productivity and streamline workflows with fast batch document conversion APIs in any .NET, Java or Cloud application.

GroupDocs.Signature

Add the power of electronic signatures in your applications with e-Signature APIs. Digitally sign Microsoft Word, Excel, PowerPoint and PDF documents.

GroupDocs.Annotation

Manage interactive and explanatory annotations to specific words, phrases and regions of the documents content in any cross platform application.

GroupDocs.Comparison

Get a difference summary report by comparing two versions of the same document using the file comparison API in any cross platform application.

GroupDocs.Assembly

Boost your document generation process with cross platform automation assembly APIs. Generate multi format documents from templates on the fly.

CData ADO.NET Subscription

Comprehensive access to data from ADO.NET.

Publisher: CData Software | Category: Data Access

Real-time data integration from 80+ SaaS, NoSQL, and Big Data sources. Includes a single SQL interface to data that insulates users from the challenges and complexities of integrating with individual APIs, SDKs, and services.

Access Data from any .NET App

Use objects to connect to data just as you would any traditional database, through the Visual Studio Server Explorer, in code, and in data controls like DataGridView, GridView and DataSet.

Connect .NET Apps to Data

Comprehensive access to application, database, and Web API data through easy-to-use tools. Whether you are building Desktop, Web, or Mobile apps you can use the drivers for fast and secure access to data.

Visual Studio Integration

The ADO.NET Data Providers can be used to access and explore data directly from the Visual Studio Server Explorer. These constructs return live data that you can work with directly from within Visual Studio.

Prices from 914,00 €
www.componentsource.com/cdata-ado-net-subscription

CData Excel Add-In Subscription

Access to applications, databases, and Web APIs directly from Excel Worksheets.

Publisher: CData Software | Category: Data Access Infrastructure

CData Excel Add-In Subscription gives Excel users unlimited access to real-time data from an extensive list of applications, databases, and SaaS sources. From Big Data and NoSQL databases, to CRM, ERP, and Accounting systems.

Included Data Sources

CData Excel Add-In Subscription includes 75+ data sources including Amazon DynamoDB, Authorize.Net, Facebook, Google AdWords, Microsoft Access, MySQL, Office 365, PayPal, QuickBooks and Xero Accounting.

Bi-Directional Access

Perfect for mass imports/exports/updates, data cleansing and Excel based data analysis. You can also modify and delete records, quickly export and backup data, and work on data with charts and pivot tables.

Easily Connect to Data

Users simply supply their credentials to create a connection and can immediately begin working with live data. The Excel Add-In is completely self-contained; no additional software installation is required.

Prices from 273,00 €
www.componentsource.com/cdata-excel-add-in-subscription

CData ODBC Driver Subscription

Connecting to data has never been easier.

Publisher: CData Software | Category: Data Access

CData ODBC Driver Subscription gives you access to live SaaS Apps, NoSQL, and Big Data from desktop clients through standard ODBC connectivity.

Connect to Live Data

The drivers include a library of 50+ functions, including String, Date and Numeric that can manipulate column values into the desired result. Popular examples include Regex, JSON, and XML processing functions.

Connect from Office Tools

Any application that can access data through ODBC, like Microsoft Excel, PowerPivot, or Word, can leverage the ODBC Drivers to connect to real-time data and help you with powerful capabilities like Mail Merge.

Read & Write Data Through ODBC

CData ODBC Driver Subscription includes 75+ data sources including Apache HBase, Azure Table, Gmail, Google Sheets, MailChimp, Microsoft Dynamics, SharePoint, SQLite, Sugar CRM, and YouTube Analytics.

Prices from 365,00 €
www.componentsource.com/cdata-odbc-driver-subscription

CData PowerShell Cmdlet Subscription

Access data directly from the PowerShell command-line.

Publisher: CData Software | Category: Data Access Infrastructure

The PowerShell Subscription offers straightforward access to live data from popular NoSQL & Big Data databases, CRM, ERP, Accounting Systems, Marketing Automation, cloud platforms, and more.

PowerShell Data Integration

Comprehensive access to application, database, and Web API data through familiar tools. The included Cmdlets enable PowerShell users to quickly and easily work with live data from virtually anywhere.

Clean & Normalize Data

Use PowerShell scripting to normalize and/or de-duplicate data or pipe data from various sources into flat-files, databases, and other data stores for archival, back-up and synchronization purposes.

Real-time Access to Data

The Cmdlets offer a simple Transact-SQL interface for connecting with data, in a virtually identical way to how a user would interact with a relational database from PowerShell.

Prices from 365,00 €
www.componentsource.com/cdata-powershell-cmdlet-subscription

CData SSIS Component Subscription

Easily connect SSIS Workflows to applications, databases and Web APIs.

Publisher: CData Software | Category: Data Access Infrastructure

CData SSIS Component Subscription provides an easier and faster way to connect SQL Server with data. It offers straightforward access to NoSQL, Big Data, and SaaS Service data through standard SSIS Workflows.

SQL Server Integration

Use CData Data Flow Tasks to connect SQL Server with data without expensive custom integration or application development. Includes full Create, Read, Update, and Delete (CRUD) support.

Connect SQL Server with Data

The SSIS Subscription offers access to all CData SSIS Components, providing SSIS Workflows with access to applications, databases and Web APIs, in minutes, through SQL Server Integration Services.

Included Data Sources

Integration with 80+ SaaS, NoSQL, & Big Data sources including Amazon SimpleDB, FreshBooks Accounting, Google Apps, Microsoft Dynamics, Office 365, QuickBooks, Salesforce & Force.com and Sugar CRM.

Prices from 731,00 €
www.componentsource.com/cdata-ssis-component-subscription

DevExpress DXperience

All DevExpress .NET Framework control libraries in one integrated subscription.

Publisher: DevExpress | Category: Presentation Layer | ★★★★★

DevExpress DXperience helps you build applications for Windows, Web, mobile and tablet with WinForms, ASP.NET, WPF and Windows 10 controls. Source code is included for all controls and libraries that ship as part of the Subscription.

Reporting for .NET

An award-winning report designer and viewer for WinForms, ASP.NET, and WPF. This reporting platform includes native integration with DevExpress controls including multi-dimensional pivot tables and charts.

50+ ASP.NET MVC Extensions

Deliver functional, elegant, interactive experiences for the Web, regardless of target browser or device. The controls are optimized for performance and efficient memory use without the loss of functionality.

Windows 10 App Controls

Includes 20+ elegant, touch-first UWP controls for Windows 10 solutions. They allow you to create compelling business solutions that emulate the look, feel and capabilities of Microsoft Office.

Prices from 1.372,00 €
www.componentsource.com/devexpress-dxperience

Dashboards & Analytics

DevExpress Universal ships with everything you'll need to create information-rich decision support systems and to distribute your dashboard solutions royalty-free.

Your Next Great Dashboard Starts Here

Learn how you can create fully customizable Dashboards with our flexible data visualization tools.

componentsource.com/devexpress-universal

DevExpress WinForms

Deliver amazing user experiences on the WinForms platform.

Publisher: DevExpress | Category: Presentation Layer | ★★★★★

Create compelling, easy-to-use experiences and emulate the UI of today's most popular productivity apps with 140+ controls including Data Grid, Spreadsheet, Scheduler, Chart, Gauge, Reporting, Pivot Grid, Navigation and UX.

Diagram Designer

Allow your end-users to create and display diagrams of various types and styles. The users can also modify existing diagrams, save diagrams to numerous file formats and load previously saved diagrams.

WinForms Spreadsheet Control

An Excel inspired control that allows you to add spreadsheet functionality to any WinForms application. It can load, convert and save workbooks to XLS format and can export and import XLSX, CSV and TXT files.

WinForms Chart Control

A comprehensive collection of 2D and 3D charts that have been optimized for performance and flexibility. The suite ships with 35+ 2D chart views and 20+ 3D views, from bars and pies to financial series.

Prices from 823,00 €
www.componentsource.com/dxperience-winforms

Reporting Made Easy

Inform and analyze with absolute ease. DevExpress Reporting includes an enterprise-ready reporting platform with integrated Windows & Web report designers.

The screenshot displays a report designer interface. On the left, a report template is shown on a grid background. It includes a logo for 'NORTHWIND TRADERS' (a lighthouse in a diamond), a company address block, and a table of invoice data. The data table has columns for Order ID, Customer ID, Salesperson, Order Date, Required Date, Shipped Date, Ship Via, Quantity, Unit Price, Discount, and Extended Price. Various fields are populated with data source expressions like [Invoices.ShipName], [Invoices.Address], and [Invoices.CustomerCompany].

On the right, the 'Text' properties pane is visible, showing settings for 'DATA BINDING' and 'SUMMARY'. The 'Parent Bookmark' property is set to 'Invoices.Address'. The 'Can Grow' property is checked, and the 'Multiline' property is also checked.

Your Next Great Business Report Starts Here

See the power and flexibility of our reporting platform in action.

componentsource.com/devexpress-reporting

ActiveReports

A flexible and extensible platform for all your reporting needs.

Publisher: GrapeCity | Category: Reporting

Design, customize, publish, and view data in your business applications. Create everything from simple invoices to complex statistical data visualizations and you can even enable your end users to design reports for themselves.

Reporting for End Users

End users always ask for tweaks in standard reports. Give them the power to make the changes themselves with a fully customizable set of designer controls including a drag and drop report designer.

Report Types for Every Need

ActiveReports helps developers design accounting, analytical, budget, risk analysis, scientific, calendar, scorecard, insurance, healthcare, clinical, stock analysis, and other business reports for their apps.

Dynamic Reports

You can control report behavior either by using events or by designing dynamic reports entirely in code. You can also use property expressions to change the run-time behavior of controls in RDL & Page reports.

Prices from 1.477,00 €
www.componentsource.com/activereports-developer

Comprehensive .NET reporting platform for every application

Design, publish, view, print, and export all of your reports. Design operational reports such as tax and government forms, invoices, and expenses; and strategic and analytical reports, such as sales performance, budgeting, and revenue analysis. ActiveReports gives you the power and flexibility you need to turn your data into informative, pixel-perfect reports across the enterprise.

ComponentOne Ultimate

A complete toolkit of fast, flexible UI controls for JavaScript, .NET & Xamarin.

Publisher: GrapeCity | Category: Presentation Layer

Develop applications for any device, on any platform. Includes ComponentOne Studio - .NET controls for Visual Studio, Wijmo - next-generation HTML5/JavaScript controls, and Xuni - native mobile controls for iOS, Android, and Xamarin.

Futureproof Your Business Apps

Includes a flexible data grid along with powerful charting controls and report integration across mobile and desktop platforms. The controls are designed to be fast and lightweight for maximum performance.

Cross-Platform Mobile Controls

Includes a collection of native controls that employ the same API across iOS, Android, and the Xamarin Platform. You'll get fast, flexible controls that deliver the same experience across all platforms.

Easy Cross-Platform Reporting

Generate reports locally in WinForms, WPF, or UWP apps. Customize reports with 70+ chart types, filtering & sorting, calculated fields and more. Export reports to multiple file types including DOCX, XLS & PDF.

Prices from 1.843,00 €

SpreadJS

Enterprise JavaScript spreadsheet and data presentation components.

Publisher: GrapeCity | Category: Spreadsheet

Includes powerful JavaScript spreadsheet and grid components that developers can use to create data views, numerical models, forms, dashboards, and reports for the Web.

JavaScript Spreadsheet

Display and manage data much like Microsoft Excel with features such as formula engine, sorting, filtering, input controls, sparklines, and native Excel file import and export. SpreadJS is optimized for speed.

Data Display and Visualization

SpreadJS includes sparklines that allow you to quickly and professionally summarize data trends. You can also show performance indicators, data bars, color scales, and more with conditional formatting support.

Function & Calculation Engine

Choose from over 300 built-in functions and apply them to individual cells, rows/columns, or entire sheets. You can also easily add an Excel-like formula text box to your sheets.

Enterprise Spreadsheets for .NET and JavaScript

The Tool of Choice for Every Business Application

GrapeCity **Spread Studio** and **SpreadJS** are spreadsheet and data presentation component suites that helps professional .NET and JavaScript developers create engineering, performance monitors, accounting, risk analysis, scientific, financial, and other enterprise business applications.

JavaScript Spreadsheet

Produce an Excel-like experience in your Web app with a fast, lightweight control allowing users to import spreadsheets, apply formulas, format and freeze cells, undo/redo, and export data to Excel.

FinancialChart for JavaScript

Instantly create stunning, advanced stock trending visualizations with the powerful FinancialChart for Wijmo. Analyze with trendlines, filters, range selectors, annotations - all with minimal coding.

Prices from 1.104,00 €
www.componentsource.com/wijmo

Xuni Enterprise

UI controls for native mobile apps.

Publisher: GrapeCity | Category: Data Visualization

Xuni includes a collection of cross-platform, native, mobile controls that employ the same API across iOS, Android & Xamarin. With Xuni, you'll get flexible, enterprise-level controls and deliver the same experience across all platforms.

Xuni FlexChart

Visualize your data in a wide range of charts including; bar, column, area, line, spline, scatter, bubble & candle. With animation and interactive features, Xuni FlexChart brings life to your mobile dashboards.

Xuni FlexGrid

Display tabular data across columns & rows with this powerful grid control. Xuni FlexGrid brings a spreadsheet-like experience to your apps, with intuitive touch gestures and quick-cell editing capabilities.

Xuni Calendar

Xuni Calendar comes complete with intuitive navigation and selection gestures, animation & built-in globalization. Customize the appearance with horizontal or vertical navigation and custom display settings.

Infragistics Professional

Build functional and stylish Enterprise-ready applications.

Publisher: Infragistics | Category: Presentation Layer | ★★★★★

Get performance, ease of use, and styling with a powerful suite of UI components that allows you to develop across all browsers, devices, and platforms.

Touch-friendly WPF Controls

Bring modern, engaging apps for desktop and touch-screen devices to market while shortening development time. Includes fast data grids, charts, dynamic data visualization, scheduling, styling and themes.

Windows Forms Controls

100+ controls that cover every aspect of software development, including Office-Style user interface tools, high performance dashboards and reports, and full modern experiences with touch & gesture support.

A screenshot of an ASP.NET Data Grid application. It shows a table with columns: 'id', 'Company', 'Contact', 'Address', 'City', 'Zip', and 'Country'. The table contains several rows of data. A search and filter overlay is visible on the left side of the table, allowing users to search for specific data.

ASP.NET Data Grid

Display and edit flat, tabular information with rich features to sort, move, filter and template your data. Features Touch friendly styling and support for flicking and multi-touch gestures on mobile devices.

Prices from 1.426,00 €

Infragistics Ignite UI (JavaScript/HTML5)

Create high-performance, touch-first, responsive apps.

Publisher: Infragistics | Category: Presentation Layer

A complete HTML5 & JavaScript toolkit to build modern browser experiences on any device - desktop, tablet or phone. Create high-performance, responsive apps with AngularJS directives, Bootstrap support and Microsoft MVC server-side widgets.

Build Modern Apps

Ignite UI plays nice with all your favorite app frameworks, databinding libraries and IDEs. With full support for AngularJS, Angular 2, KnockoutJS, Microsoft MVC, Bootstrap, React and more, the choice is yours.

Lightweight and Fast

Ignite UI delivers best-in-class performance for your high-demand data needs. The virtualized, load-on-demand data grids can handle any data scenario.

Data Visualizations

With HTML5 charts, gauges, financial charts, statistical and technical indicators, trend lines and more, deliver the most demanding and beautiful touch-friendly dashboards for desktop and mobile apps.

Prices from 662,00 €

InstallAware Studio Admin

A powerful software installation solution with a Web-based automation interface.

Publisher: InstallAware | Category: Release Automation & Management

InstallAware Studio Admin is a software installation solution for Windows that provides you with the advantages of true rapid-Windows Installer development productivity.

InstallAware Transformer

Give non-developers a point-and-click way to create MST transform files for any MSI setup. Any user may run through the setup, and instead of installing the package, InstallAware creates an MST transform file.

Extension for Visual Studio

Want to build a Win32/Win64/.NET app as an APPX package so you can bridge it to the Universal Windows Platform via Microsoft's Desktop Bridge? Click once and you are ready for submission to the Windows Store.

Advanced Service Configuration

Windows Service Configuration parameters come in handy when proofing your target deployments against failures. Includes setting the time delay of an auto-start service, to choosing when to run failure actions.

New **InstallAware X6** with Installation Tailoring,
Advanced Service Configuration with Failure Actions,
Unicode Setup Capture with Stackable Noise Filters,
and an Open Source Desktop Bridge.

- › Visually create MST Windows Installer transform files using the new InstallAware Transformer
- › Configure advanced Windows Service properties and set custom failure actions for each sequential failure
- › Use the industry's fastest setup capture, now fortified with new, stackable filters to eliminate capture noise
- › Lock script variable values from the command line, accelerate Windows Installer setup performance
- › Cross Microsoft's Desktop Bridge toll-free to the Universal Windows Platform APPX Highway!

www.componentsource.com/installaware

InstallAware Developer

A fast and scalable way to deliver ultra-rich, ultra-fast Windows installations.

Publisher: InstallAware | Category: Release Automation & Management

InstallAware Developer enables MSIcode scripting for rapid setup development without the high cost and steep learning curve of other setup solutions.

Windows Store Apps

Getting your existing Win32, Win64, and .NET apps to the Windows Store is easy. The included Universal Windows app template is easily customized, and creates a ready-to-submit project in seconds.

Superior 64-bit Compression

InstallAware's 64-bit compression engine provides extremely high rates of compression. For example, Microsoft SQL Server runtimes are reduced a further 50% beyond Microsoft's already compressed sizes.

Hybrid Installation Technology

Switch between Windows Installer and Native Code setup engines at runtime, at will, as often as you need. Best of all, it takes just one line of code to enter and exit Native Engine mode.

Prices from 914,00 €
www.componentsource.com/installaware-developer

Only **InstallAware X6** Integrates with Visual Studio 2017, Building Desktop Bridge APPX/Universal Windows Platform, App-V Virtualization, and MSI Windows Installer Packages from a Single Click on the InstallAware Extension Toolbar

- › New InstallAware X6 Visual Studio Extensions integrate with all Visual Studio versions - 2003 through 2017
- › Click on the InstallAware Extension Toolbar buttons to build MSI, APPX, or even App-V packages for your projects
- › Detect and deploy the latest application frameworks, including Microsoft .NET 4.6.2, and MFC 14.10
- › Integrate with Team Foundation Server versions 2010 through 2017 for seamless team collaboration
- › Reduce runtimes such as Microsoft SQL Server 2016 Express with SP1 to half of its eady-compressed size!

Syncfusion Big Data Platform

A complete Hadoop distribution designed for Windows.

Publisher: Syncfusion | Category: Data Integration & Access

Syncfusion Big Data Platform gives you complete access to the Hadoop environment. It includes a complete production environment that can run Hadoop jobs in a scalable manner on a full cluster.

Manage & Monitor Clusters

Included cluster management system comes with built-in support for managing multiple clusters. All that's needed to easily manage and monitor multiple clusters is a Web browser.

Easily Create Clusters

With the Syncfusion Hadoop distribution, in minutes you can create production clusters using commodity machines running the most recent versions of Windows.

Easily Monitor Job Status

The platform's monitoring system provides information on the general health of your cluster. It also provides detailed metrics on nodes that are part of the cluster and jobs running on the cluster.

Prices from 1.824,00 €

TEXT CONTROL

Software • Training • Consulting

Text Control ReportingCloud

Web API reporting platform to create MS Word compatible reports in the cloud.

Publisher: Text Control | Category: Cloud Services

Use the Text Control ReportingCloud Web API to merge MS Word compatible templates with JSON data from all clients such as .NET, Javascript, PHP, NodeJS, jQuery, Python, Android, Java, iOS and many more.

Design Your Template

Create customized invoices, contracts and quotes directly using the WYSIWYG online template designer.

Merge With Data

Using simple HTTP requests, merge fields and repeating blocks in templates can be merged with hierarchical JSON data from within your application.

Retrieve Created Document

The merged templates are returned as Adobe PDF, MS Word and HTML format and you can use them immediately in your application.

TEXTCONTROL

Prices from 341,00 €
www.componentsource.com/text-control-reportingcloud

ALL ABOUT DOCUMENTS

Text Control provides deep functionality components and consulting to integrate reporting and word processing into .NET Windows, web and mobile applications.

Reporting and Mail Merge

The Text Control Reporting Framework combines powerful reporting features with an easy-to-use, MS Word compatible word processor for ASP.NET, WPF and Windows Forms. Users can create documents and templates using ordinary Microsoft Word skills.

TX Text Control is completely independent from MS Word or any other third-party application and can be completely integrated into your business application.

MS Word compatible Rich Text Editing

These feature-complete, fully programmable rich edit controls offer developers a broad range of word processing features in reusable UI and non-UI components for ASP.NET, WPF and Windows Forms.

They provide comprehensive text formatting, powerful mail merge features and all word processing key concepts such as table support, images, headers and footers, page sections and spell checking.

Load and Save Adobe PDFs

Using TX Text Control, Adobe PDF and PDF/A documents can be created including document access security settings and digital signatures.

PDF documents can be imported to be viewed, edited and converted. Edit PDF documents just like any other format such as DOC or DOCX. A fully featured API can be used to modify the content or to search through the document.

TEXT CONTROL

Actipro SyntaxEditor for Winforms

A syntax-highlighting code editor control and parsing suite.

Publisher: Actipro Software | Category: Code Editing & Syntax | ★★★★★

SyntaxEditor is a powerful text editing control that is packed with features for efficient code editing, including syntax highlighting, code outlining, parsing, line numbers, block selection, IntelliPrompt UI and split views.

A screenshot of the SyntaxEditor control displaying HTML and JavaScript code. The HTML tags are highlighted in light blue, the CSS block in light green, and the JavaScript code in light yellow. The code includes a title, a CSS style for a red color, and a JavaScript alert function.

Syntax Highlighting

Over 100 edit actions are included with SyntaxEditor that cover everything from basic caret movement and selection, to features such as tabification, character/word/line transposition, etc.

A screenshot of the SyntaxEditor control showing a C# class named 'CodeSnippetTest'. A context menu is open, displaying a list of code snippets. The first snippet, 'Computes the SHA1 hash code of a password', is selected. The snippet text is visible in the background code.

Code Snippets

A code snippet is a fragment of code or text that you can store in a Visual Studio-compatible XML file and reuse at a later time. When a code snippet is activated, it inserts its text into SyntaxEditor.

A screenshot of the SyntaxEditor control showing CSS and JavaScript code. The code is organized into collapsible sections, indicated by expand/collapse icons on the left margin. The CSS block is highlighted in light green, and the JavaScript code is in light yellow.

Code Outlining (Folding)

Syntax languages can automatically choose where to create outlining nodes (based on tokens, AST's, etc.) or the end user can choose to create outlining nodes via selected text.

Janus GridEX for .NET

A data-aware, fully editable Outlook-style grid component.

Publisher: Janus Systems | Category: Grids | ★★★★★

Janus GridEX implements its own data binding mechanism in order to perform sophisticated data manipulation. It also has an unbound mode for managing data in any format without sacrificing any group or sort capabilities.

CardView

Janus GridEX for .NET CardView supports multicolumn layouts and the ability to expand or collapse cards. ColumnSets can also be used while the control is in CardView.

Filtering

Define simple or complex conditions that can be used to filter, format or find rows which conform to the criteria. The control also presents a filter row which permits users to easily filter the data.

Hierarchical Data Display

Create effective Outlook-like user interfaces that display hierarchical data. The control allows you to display, edit, sort, group, filter, manipulate, summarize, preview and print your data.

Prices from 466,00 €
www.componentsource.com/janus-gridex-net

Janus WinForms Controls Suite v4

Add powerful Outlook style interfaces to your applications

Janus WinForms Controls Suite enhances your applications with a powerful user interface that features the familiar Outlook visual style. All controls are 100% .NET managed code, 64-bit compatible and support Visual Studio and .NET Framework Client Profiles.

Janus WinForms Controls Suite includes sample applications that let you quickly add Outlook look and feel to your applications.

Janus
systems

LEADTOOLS Document Imaging Suite SDK

Develop powerful document imaging applications.

Publisher: LEADTOOLS | Category: Image Editing & Processing | ★★★★★

Build end-to-end document imaging solutions that require OCR, OMR, barcode, forms recognition and processing, PDF, conversion, annotation, HTML5 Zero-footprint viewing, print capture and image viewing functionality.

Forms Recognition

In addition to basic forms recognition with static field locations, LEADTOOLS is able to detect and process unstructured and semi-structured documents such as invoices, driver's licenses, and passports.

PDF Technology

Includes extraction of text, images, hyperlinks, editing of bookmarks and annotations, page replacement, split and merge existing documents, convert to PDF/A, linearization and PDF document compression.

Document Viewer

With only a few lines of code you can create robust, fully featured applications with rich document viewing features, including text search, annotation, inertial-scrolling, paging, and vector display.

PDFXpress .NET

Quickly and easily create applications with a real PDF rendering solution.

Publisher: Accusoft | Category: PDF

Enhance your apps with a broad range of PDF features including file creation, editing, text and image extraction, and standard PDF security using easy-to-implement, concise code.

Create and Edit PDF and PDF/A

Generate PDF files from text and images and edit existing PDFs. You can also create PDF/A-1b archive files and add images from several image formats including TIFF, JBIG2, PNG, GIF, JPEG, JPEG 2000, BMP & RAW.

Add Security Settings

Access the security settings of a document including permissions, encryption method and passwords. You can edit or remove security settings from a secure document or add security to a non-secure document.

Break Out & Manipulate Pages

Create applications that can break open the PDF page structure so you can add, delete and rearrange. You can extract specific pages, rotate pages, insert and re-order pages and merge or split PDF files.

Prices from 1.920,00 €

BCGControlBar Library Professional Edition MFC

Create Microsoft Office and Microsoft Visual Studio-like applications.

Publisher: BCGSoft | Category: UI & Interaction

Includes a rich set of GUI controls such as Chart, Calendar, Grid, Editor and Gantt. BCGControlBar Library has over 500 thoroughly designed, tested and fully documented MFC extension classes that will save you hundreds of development hours.

Ribbon Control

The Ribbon control replaces traditional toolbars and menus with tabbed groups (known as categories). Each tab is logically split into panels and each panel may contain various controls or command buttons.

Office Look & Feel

BCGControlBar Library provides a Microsoft Office look and feel. This is a skinned interface that can be applied to the various sets of controls such as ribbons, menus, toolbars, docking panes and more.

Chart Control

Create 2D and 3D charts with an unlimited number of series and unlimited data points. You can customize data markers and data labels, and data point values can be modified on the fly for real-time charting.

Prices from 731,00 €
www.componentsource.com/bcgcontrolbar-library-professional

ProEssentials

Add financial, scientific, engineering and business charts to your applications.

Publisher: GigaSoft | Category: Charts | ★★★★★

ProEssentials is ideal for realtime or continuous running chart implementations and includes a robust feature set, quality rendering, and simple implementation and distribution.

Scientific Graph

Pass large amounts of data into the graph and easily view the information in smaller/clearer increments via zooming or dialog adjustments. Zooming can be invoked by left-button dragging a zoom box.

Graph Types

Includes many different chart types: Line, Bar, Point/Scatter, Area, Points plus Best-Fit-Curve, Spline, High-Low Line, High-Low Bar, High-Low-Close, Open-High-Low-Close, Box Plot/Candlestick, Bubble and Step.

Graph Annotations

Annotations allow for mixing text and symbols in a tabular fashion within the chart or boundary of a chart. Table annotations can contain header columns and rows, hot spots, and real-time updating.

Prices from 2.925,00 €
www.componentsource.com/proessentials

PostSharp Ultimate

Add design patterns and thread safety to C# and VB.

Publisher: PostSharp Technologies | Category: Coding & Debugging

Allows developers to eradicate boilerplate code by offloading repetitive work from humans to machines. It contains ready-made implementations of most common patterns and gives you the tools to build your own patterns.

Add Patterns to C# and VB

PostSharp extends C# and VB with the notion of patterns. The result is cleaner code that is easier to write and understand, contains fewer defects and is less expensive to maintain.

High Performance Logging

Add comprehensive logging to your app without any impact on the code. Log entries contain the values of all input parameters and return values adding valuable information for maintenance and support work.

Thread Safety

Starting new threads and tasks in .NET languages is simple, but ensuring that objects are thread-safe is not. Choose the threading models that you want and have built-in verification detect errors in your code.
